

The Gödel High Range IQ Test by Dr Jason Betts

See the Score and Norming Data File at www.psiq.org/lux for the submission instructions and guidelines. The use of the internet and all reference materials is recommended to research all terms not fully understood.

Most answers are only one word, but three may be up to five word phrases, describing one specific thing. Each item has multiple answers, weighted from 1 to 4. There is a total of lots more than the item numbers. This is a philosophical test of lateral and divergent thinking, and not one of simplistic logical convergence.

Consider the clues and expand on them, and then step back and see the bigger picture in absolute terms. Sometimes the answer is not directly related to the clues, sometimes it is - but it should jump out at you. Submit only your best answer for each item, which will be graded from 1 to 4 only after 30 submissions.
