Organisations/Memberships:
World Genius Directory, Poetic Genius Society, Grand IQ Society, ISI-Society, Global Genius Generation Group (4G).
Although I want to continue my many creative pursuits, especially in theoretical physics, poetry, art, and videos, at 59 years old, I mostly want to help people realize that my EINSTEIN WRONG: UFT PHYSICS, with its three peculiar dimensions, is a tremendous breakthrough in theoretical physics.

Why work with IQ:
I crave stimulation from IQ tests and from high-level communication with other geniuses. These have caused many of the funniest, happiest days of my life. I want to encourage and direct males and females to enjoy attempting appropriate IQ tests. Further, I believe that creativity is very significant and should often be tested or stimulated with intelligence.

Statement for the World:
Fifty years ago, geniuses were called "misfits" or "freaks", and bored by normal education systems. Interaction between geniuses, recently, over the internet, especially led by Ivan Ivec and Dr Jason Betts, has normalized geniuses, has made them feel accepted, and is enabling intellectually-gifted humans to discover new directions in thought. The World needs this interaction between its most intelligent humans, to find answers for serious problems humanity is facing.
