### Goal for IQ as a WGD Ambassador Genius of the Year:

I want to bring artistic talent into the focus and try make the world a little bit better.

### Organisations/Memberships:

I am a member of approximately 30 High IQ societies, including the Poetic Genius Society, the ISI-Society and Mensa International's Exceptionally and Profoundly Gifted SIG (Special Interest Group). I am also a founding member of The World Genius Directory!

### Occupation/Professional Goals:

I am an actress, artist, writer and filmmaker. I won several film and media awards, including the Bavarian Film Award, the BAMBI and the German Actors Award and the famous Chaplin Shoe, awarded by the Association of German Film and Television Directors. My goal is plain and simple, to make other people happy through my Art.

### Why work with IQ:

As a former actress in German TV and international movies I made the experience that it is often easier to work without IQ. As a creative artist I use my IQ to create wise and meaningful art and poetry for those who have 'eyes to see' and 'ears to hear'.

### Statement for the World:

Let there be Art! Foster the artistic genius!

Since the first appearance of homo sapiens on this planet there was Art. Ancient cultures talk to us through their artistic geniuses, leaving their traces in caves, on walls, in ancient scripts. They act as a medium between us and the past. Today we live in societies primarily dominated by cooperate companies and their worker bees. In such a world it is the duty of the artistic genius to transform the mind with beauty and light. Through Art, a pen becomes a bird, and a piece of paper becomes hope again. Let us remember Art.

### Favourite Quotation:

"Only a fool thinks of himself to be wise, but a wise man knows of himself to be a fool." - William Shakespeare.
